<p>Warnings about the risks of taking a loan</p>	<p>By taking a loan with variable interest rates, you expose yourself to the interest rate risk, which can affect your ability to pay. This risk is generated by the increase in the benchmark index as a component of the interest rate stated, which can raise the interest rate and increase the monthly instalment. Your income may vary. Please make sure you can pay the monthly instalments should your income decrease. Also, the total cost of the loan, as shown by the EIR, can change during the loan agreement.</p>
